Porque Yo Lo Reparo

Step by step tutorial: of LG Nexus 5 Lower module (antenna and speaker)

For this tutorial you will need the following spared parts and tools that you cant get at our online store Impextrom.com
Click on a tool for visit the website.

Terminal opening
tool, plastic

0,71 €

Special SAT 0.75mm
high friction PVC pick

1,07 €

Step 1 - Back cover

Before starting make sure that the equipment is turned off.

With an opening tool release the hooks of the cover all around the contour.

Step 2

The bottom of the lid has a line of glue.

Remove it with a pick.

Step 3

Separate the back cover.

Step 4 - Intermediate housing

Release the hooks on the intermediate housing and remove it.

Step 5 - Battery

Disconnect and unfold the interconnection flex.

Step 6

Disconnect the battery cable.

Step 7

The battery is attached to the chassis.

Remove it by prying it with the opening tool.

Do not deform the battery as it may damage it.

Step 8 - Lower module (antenna and speaker)

Remove the antenna module with loudspeaker.
