1,25 €

Step 1 - Back cover

We start by heating the back cover at about 60 ° C for about a minute to soften the adhesive. Once hot, we will slide an opening tool between it and the frame to take it off.

Step 2 - Remove antenna module and headset

Remove the four Phillips screws (PH # 00) and the stickers that hold the headset and antenna module. Then we will desencajaremos levering in the place that we indicate in the fourth and fifth image.
