1,25 €

Suction cup for disassembling and repairing

0,51 €

Earpiece buzzer module with antenna for Huawei P8 Lite 2017, PRA-LX1

3,96 €

Step 1 - Remove back cover

We started by taking off the back cover. To do this, we will introduce an opening tool between it and the frame and we will slide it to remove the adhesive.

Before detaching the lid, we will disconnect the flex from the fingerprint reader.

Step 2 - Speaker module

Remove the seven Phillips screws (PH # 00) that hold the module and unlock it.

It only remains to take off the vibrator.
