Click on a tool for visit the website.

Opening tool
Smartphone, tablet

2,19 €

Pinza antiestática
ESD redondeada

3,06 €

Smartphones and PC
repair tool case

35,92 €

Step 1 - Remove back cover

We start by removing the back cover. To do this, we will leverage with an opening tool or directly with our hands we can open it.

Step 2 - Remove intermediate housing

Now we remove the battery and remove the fourteen Phillips screws (PH # 00) that hold the housing. We can now remove the case by prying it with the opening tool to release it from the notches that hold it.

Step 3 - Antenna contacts plate

All that remains is to disconnect the coaxial antenna cable and detach the chassis plate.
