Click on a tool for visit the website.

Heat-opening thermal mat, CPB320

69,61 €

Opening tool Smartphone, tablet

2,19 €

Pinza antiestática ESD redondeada

3,07 €

Special SAT 0.70mm PET pick, high friction and resistance

1,25 €

Suction cup to separate screens in general

5,25 €

Step 1 - Take off screen

We start by removing the screen. For this we heat it to about 60°C for about a minute.

With the hot screen, we slide a flat tool around the contour to take it off. We will try not to bend it much and we will not approach the display to avoid damaging it.

Step 2 - Remove screen

Once detached, we will open it as a book to disconnect the flex from the home button and the screen button.

Step 3 - Front camera flash

All that remains is to take off the screen flash.
