For this tutorial you will need the following spared parts and tools that you cant get at our online store Impextrom.com
Click on a tool for visit the website.

Screwdriver with 8 heads Peng Fa 7339A

6,96 €

Opening tool Smartphone, tablet

2,19 €

Pinza antiestática ESD redondeada

3,06 €

Special SAT 0.75mm high friction PVC pick

1,07 €

Step 1 - Back cover

To remove the back cover, we introduce an opening tool to release the notches that hold it.

Step 2 - Remove intermediate housing

We remove the thirteen Phillips screws (PH # 00) that hold the housing and with the help of an opening tool we will unhook it from the chassis.

Step 3 - Volume key

Remove the two screws that hold the key holder. Then we remove the key from the frame.
