3,06 €

Special SAT 0.70mm
PET pick, high friction
and resistance

1,25 €

13 x 6 mm generic
earpiece speaker

0,95 €

Step 1 - Remove battery module

To remove the battery, press the button indicated in the third image and pull until it is removed.

Step 2 - Remove back casing

We remove the two Phillips screws (PH # 00) that we will find in the lower part after removing the loudspeaker module. We remove the SIM / SD tray and unlock the screen introducing an opening tool between it and the frame.

Step 3 - Handset

The only thing left is to unhinge the headset from the chassis.
