3,06 €

Special SAT 0.70mm PET pick, high friction and resistance

1,25 €

6-in-1 screwdriver, K-8107 with different heads, in blister

7,52 €

Step 1 - Remove back casing

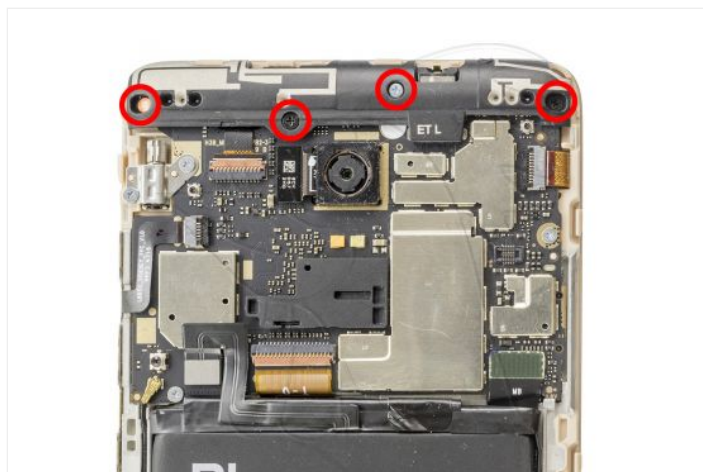

We start by removing the SIM / SD tray. Then, we introduce an opening tool between the frame and the casing to disengage it.
Before removing the housing, we will disconnect the fingerprint sensor.

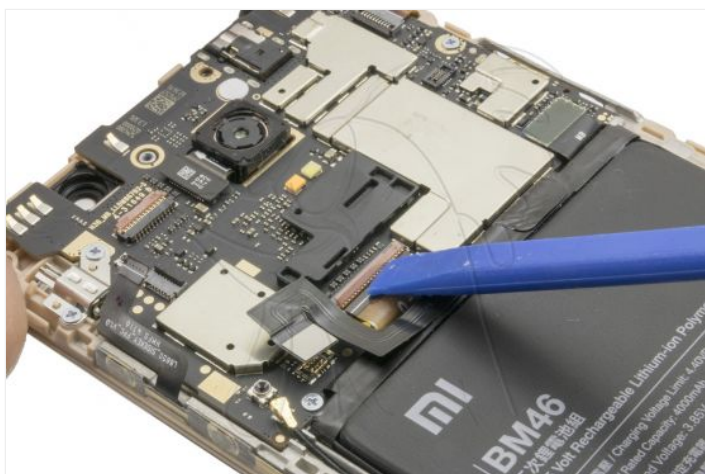

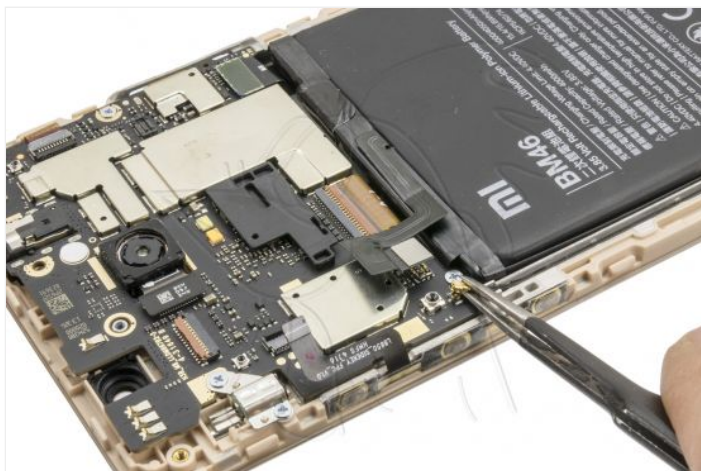

Step 2 - Remove upper antenna module

To remove the upper antenna module, we will simply have to remove the four Phillips screws (PH # 00) that hold it and then disengage it.

Step 3 - Disconnect components

In this step we disconnect the components connected to the board.

Step 4 - Motherboard

Remove the four screws that hold the base plate and disengage. We only need to disconnect the rear camera.
