Porque Yo Lo Reparo

Step by step tutorial: of ZTE Blade A602 Frontal camera

For this tutorial you will need the following spared parts and tools that you cant get at our online store Impextrom.com
Click on a tool for visit the website.

Opening tool
Smartphone, tablet

2,19 €

Pinza antiestática
ESD redondeada

3,07 €

Step 1 - Back case

First of all we have to unhook and remove the back cover.

Step 2 - Intermediate housing

We extract the eleven Phillips screws (PH # 00) that hold the intermediate housing and with the help of a tool with the flat tip, we will unhook the housing.

Step 3 - Frontal camera

We disconnect and remove the front camera that we have to replace.
