mm generic buzzer
speaker

1,12 €

Step 1 - Opening

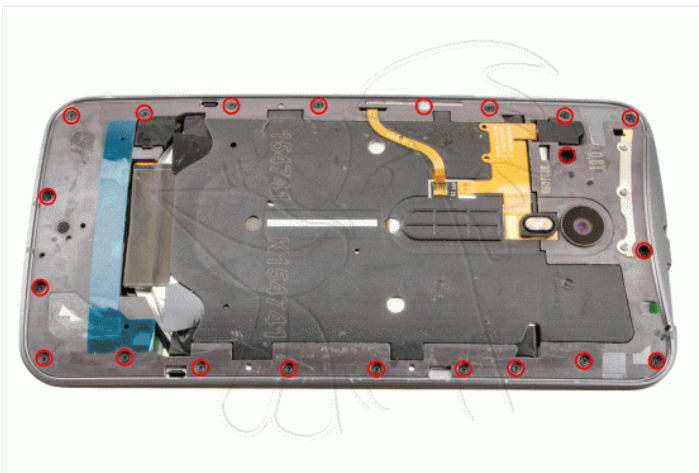

Insert the SIM extraction tool into the opening hole located in the upper part of the rear housing, and facilitate the entry of the tine. With the prong go separating the back cover.

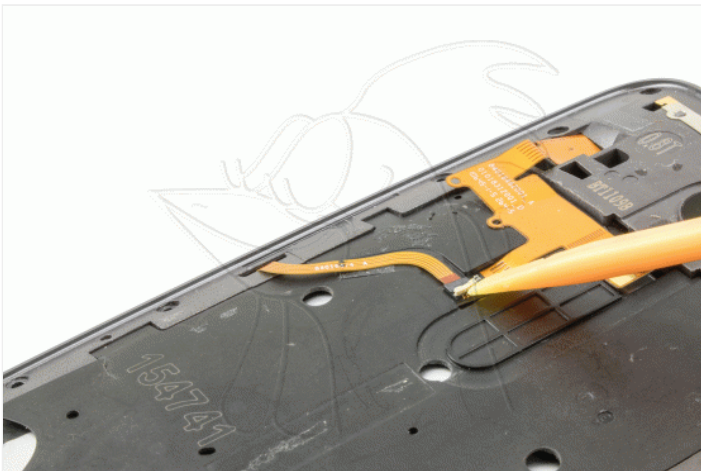

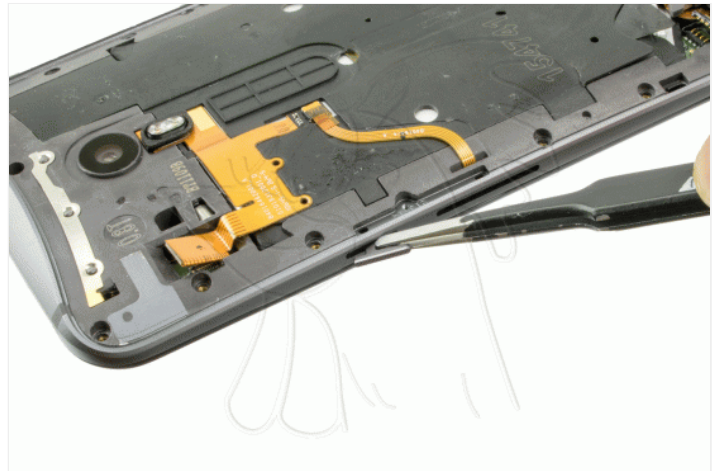

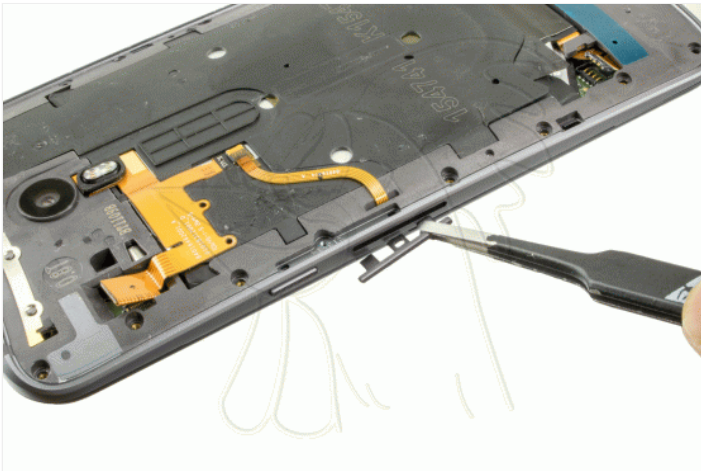

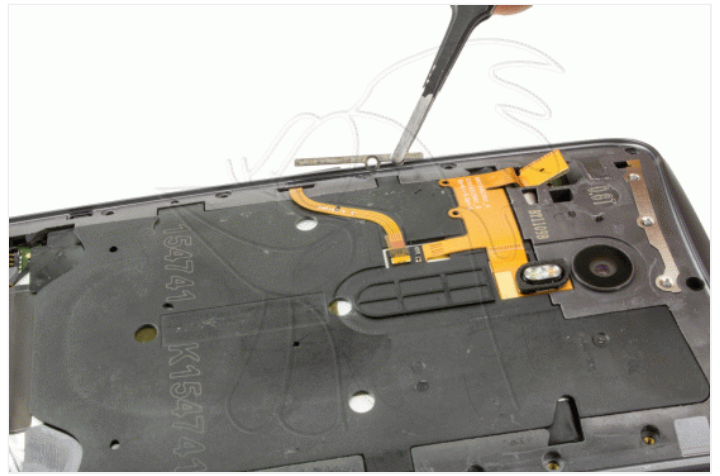

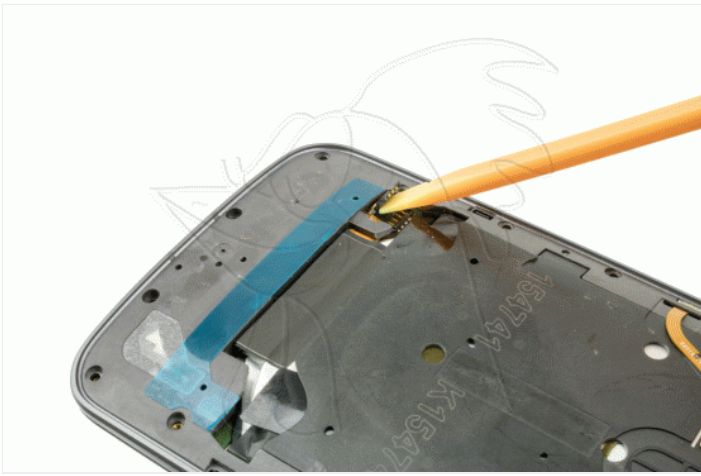

Step 2 - Remove intermediate housing

Remove the torx screws that hold the intermediate housing. Remove the rubber stops that protect the connections, and release them with the opening tool. With the clamps, remove the button clamping plate and remove the buttons. With the opening tool release the flash connection and remove the intermediate housing.

Step 3 - Extract speaker

With the curved tip tool, remove the loudspeaker from the lower wall of the base plate.
